Matheno, who taught Yahya (John) to be the Holy Harbinger, as Elihu who taught Yehoshua (Jesus) to be a Holy Prophet, were both Kemetian Adept Masters (Perfected men, Gods realized in transmutable human form. Dear Students: Do not be deceived by the Western Free Masonic regulatory rules of government which confines the age of Adulthood to 18 or 21. These laws are neither natural nor harmonious with the divine order of creation. Indeed, Europeans e.g. Socrates, Plato, Aristotle and Hippocrates were taught the power of the number 12 when they were students in Africa’s Egypt; see the attached: “Ancient Kemetians First Taught The #12.”

1. When John was twelve years old (Twelve is as old as any child gets. 12 is the number for government because this is the age when the minds and bodies of dependent children matures into responsible adults. his mother died, and neighbors laid her body in a tomb among her kindred in the Hebron burying ground, and near to Zacharias’ tomb.
2. And John was deeply grieved; he wept. Matheno said: “It is not well to weep because of death.
3. Death is no enemy of man; it is a friend who, when the work of life is done, just cuts the cord that binds the human boat to earth, that it may sail on smoother seas.
4. No language can describe a mother’s worth, and yours was tried and true. But she was not called hence until her tasks were done.
5. The calls of death are always for the best, for we are solving problems there as well as here and one is sure to find himself where he can solve his problems best. (Today’s Carnal man is entombed with the thousand “CAUSES of Death” rather than the universal “One CALL of Death.” More important is the CALLs of death than the causes. Death is an AngEl of the Great God which carries only the message of death, that cuts the cord that binds the body to the soul, when it is called to do so. Time never was when man was not and all things that begin with time must also end within that time at the one call of death. All living things must die when death has been called to end its time.
6. It is selfishness that makes one wish to call again to earth departed souls.
7. Then let your mother rest in peace. Just let her noble life be strength and inspiration unto you.
8. A crisis in your life has come, and you must have a clear conception of the work that you are called to do.
9. The sages of the ages call you harbinger. The Prophets look to you and say: ‘He is Elijah come again.

Elijah (Standard Hebrew: מְנַעֵל יְחִידוּד), also known as Elias (New Testament Greek: Ἠλίας), was a ninth-century B.C.E. prophet of the Hebrew Bible whose name has been variously translated as "whose God is the Lord," "my God is the Lord," and "my God is Jehovah."

Elijah is considered to be one of the great prophets of the Abrahamic religions because he warned people against forgetting God's commandments and advised the Israelites to repent of their polytheistic ways. The Bible also describes Elijah as a divinely-inspired wonder worker, and a forerunner of the coming messiah. It is believed that the prophet Elijah shall return to Earth prior to the millennial Day of the Lord, and many Jews expect Elijah to help restore their nation.

The further development of Elijah as a harbinger of the arrival of the Messiah is developed throughout later Jewish and Christian traditions. As a result, Elijah is a shared prophet in Judaism, Christianity and Islam alike, also in Mormonism and other new religions. He is a deeply respected figure by the followers of many world religions who see Elijah as an archetype who stands for both justice and the hope of restoration.

10. Your mission here is that of a harbinger for you will go before the Messiah’s face to pave His way, and make the people ready to receive their King.
11. This readiness is purity of heart; none but the pure in heart can recognize the King.
12. To teach men to be pure in heart you must yourself be pure in heart and word and deed.

13. In infancy the vow for you was made and you became a Nazarite. The razor shall not touch your face or head, and you shall not taste wine or fiery drinks.

Hebrew: form Nazarite the name of such Israelites as took on them the vow prescribed in Num. 6:2-21 The word denotes generally one who is separated from others and consecrated to God. Although there is no mention of any Nazarite before Samson, yet it is evident that they existed before the time of Moses. The vow: of a Nazarite involved these three things,

1. abstinence from wine and strong drink,
2. refraining from cutting the hair off the head during the whole period of the continuance of the vow, and...
3. the avoidance of contact with the dead.

14. Men need a pattern for their lives; they love to follow, not to lead.
15. The man who stands upon the corners of the paths and points the way, but does not go, is just a pointer; and a block of wood can do the same.
16. The teacher treads the way; on every span of ground he leaves his footprints, clearly cut, which all can see and be assured that he, their master, went that way.
17. Men comprehend the inner life by what they see and do. They come to Allah, through ceremonies and forms.
18. And so when they would make men know that sins are washed away by purity in life, a rite symbolic may be introduced.
19. In water wash the bodies of the people who would turn away from sin and strive for purity in life.
20. This rite of cleansing is a preparation rite and they who thus are cleansed comprise the temple of purity.
21. And you shall say, you men of Israel, hear; reform and wash; become the sons of purity, and you shall be forgiven.
22. This rite of cleansing and this temple are but symbolic of the soul, which does not come with outward show, but is the temple within.
23. Now, you may never point the way and tell the multitudes to do what you have never done; but you must go before and show the way.
24. You are to teach that men must wash; so you must lead the way, your body must be washed, symbolic of the cleansing of the soul.
25. John said: “Why need I wait? May I not go at once and wash?”
26. Matheno said: “Tis well,” and they went down to the Jordan ford, and east of Jericho, just where the host of Israel crossed when first they entered Canaan, (After they had wondered 40 years as “Hebrews”) they tarried for a time.
27. Matheno taught the harbinger, and he explained to him the inner meaning of the cleansing rite and how to wash himself and how to wash the multitude.
28. And in the river Jordan, John was washed; then they returned unto the wilderness.
29. Now in Engedi’s hills Matheno’s work was done and he and John went down to Egypt. They rested until they reached the Temple of Sakara in the valley of the Nile.

(Sakkara is one section of the great necropolis of Memphis, the Old Kingdom capital and the kings of the 1st Dynasty as well as that of the 2nd Dynasty. are mostly buried in this section of the Memphis necropolis. It has been of constant interest to Egyptologists. Three major discoveries have recently been made at Sakkara, including a prime minister’s tomb, a queen’s pyramid, and the tomb of the son of a dynasty-founding king. Each discovery has a fascinating story, with many adventures for the archaeologists as they revealed the secrets of the past. Sakkara is best known for the Step Pyramid, the oldest known of Egypt's 97 pyramids. It was built for King Djoser of the 3rd Dynasty by the architect and genius Imhotep, who designed it and its surrounding complex to be as grand as it was unique and revolutionary. Imhotep was the first to build stone tombs in honor of the king's majesty. His many titles included 'Treasurer of the King of Lower Egypt', 'Administrator of the Great Palace', and 'Imhotep the Builder, the Sculptor, the Maker of Stone Vessels'. Imhotep may have also designed the pyramid of Djoser's successor, Sekhemkhet.)

30. For many years, Matheno was a master in this temple of the Brotherhood, and when he told about the life of John and of his mission to the sons of men, the hierophant with joy received the harbinger and he was called the Brother Nazarite.
31. For eighteen years John lived and wrought within these temple gates; and here he conquered self, became a mastermind and learned the duties of the harbinger.
The Ancient Kemetians First Taught

12

12 = 3 + 4 + 5.

12 is an **Abundant Number**.

12 is a **Pentagonal Number**.

12 is a **Centered 11-gonal Number**.

12 can be **Partitioned** in 77 ways.

12 can be Partitioned 7 times with each term no larger than 2.

12 can be Partitioned 19 times with each term no larger than 3.

12 can be Partitioned 34 times with each term no larger than 4.

12 can be Partitioned 47 times with each term no larger than 5.

12 can be Partitioned 58 times with each term no larger than 6.

12 can be Partitioned 65 times with each term no larger than 7.

12 can be Partitioned 70 times with each term no larger than 8.

12 can be Partitioned 73 times with each term no larger than 9.

12 can be Partitioned 75 times with each term no larger than 10.

12 can be Partitioned 76 times with each term no larger than 11.

12 is the total number of parts in all **Partitions** of 4.

The number of equivalent hyper spheres in 3 dimensions which can touch an equivalent hypersphere without any intersections = 12. (Kissing Number)

The Cube is a **Platonic Solid** with 12 Edges.

The Dodecahedron is a **Platonic Solid** with 12 Faces.

The Icosahedron is a **Platonic Solid** with 12 Vertices.
A Truncated Tetrahedron is an Archimedean Solid with 12 Vertices.

A Cuboctahedron is an Archimedean Solid with 12 Vertices.

The Chemical Element Magnesium has an atomic number of 12.

The 12 Star signs: Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius and Pisces.

The 12 simple letters of the Hebrew Alphabet.

In Humans: the Heart Chakra (Anahata) has 12 petals. The petals may correspond with 12 verities: lustfulness, fraudulence, indecision, repentance, hope, anxiety, longing, impartiality, arrogance, incompetency, discrimination and defiance.

The 12 permutations of the Tetragrammaton, the 4 fold name of God.

The twelve 'nidanas' or links of pratitya sammupada or dependant co-arising.

The twelve oxen on the porch of Solomon's temple.

The twelve stars surrounding the Virgin's head in Rev. 12:1.

The Ancient Kemetians First Taught

12

While the Moorish Peoples were comatose in the United States by the west many of their ancient sciences used to educate and civilize the world were stolen, DE-GODded, denationalized and then introduced to the modern world as “White-owned.” The following article is a sample section from the book Studies In Astrological Bible Interpretation, by Daniel Ferrera available through the Sacred Science Institute. Moors, go back in mind into the land of fleshless things, call remembrance to your aid and see where “Daniel Ferrera” not only got the name “Dani-EL” but the following teachings as well. (SA #1)

The number 12 appears several times in the Bible, i.e., the twelve tribes of Israel, the twelve disciples of Christ, twelve stones, twelve princes, etc. It is my belief that these represent the twelve signs of the zodiac: Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricorn, Aquarius and Pisces.

The number twelve is symbolic of the creation of the universe as it represents the division or fractionating of unity (God) into twelve individual distinct vibrations or tones. This is most readily seen in music. If you take a string instrument, much in the same manner that Pythagoras did with the monocord, you will find that there are exactly 12 notes or tones before the series repeats. All repeats or octaves are related to the original note or vibration by powers of 2. That is
to say that if you take a note and double its vibration frequency or cut it in half you will manifest exactly the same note in a higher or lower octave respectively. The notes have been named: a, a-sharp, b, c, c-sharp, d, d-sharp, e, f, f-sharp, g, g-sharp in chromatic fashion. If I was trying to teach music, I would have included flats instead of making the notes all sharps but this is not important as the vibration or tone is the same. For example, c-flat is the same sound or note as b.

Now that we know that there are twelve and only twelve notes we can start to see or imagine the process of creation as a fundamental division from unity into 12 unique qualities. These fundamental qualities can also vibrate at faster or slower frequencies through the powers of 2 or duality. This is similar in concept to water existing as a gas, liquid, or solid based upon temperature.

“In the beginning, when God created the heavens and the earth, the earth was a formless wasteland”. First, God said “Let there be light” and this created (1) “day” & (2) “night”. Then God created the (3) earth and the (4) Sea. (5) Let the earth bring forth vegetation, (6) Lights in the sky for signs and seasons. (7) Then he creates two great lights, the greater to govern the day, (8) the lesser to govern the night. (9) Let the water teem with an abundance of living creatures. (10) Birds in the sky. (11) Let the earth bring forth-living creatures. (12) Let us make man in our own image, after our likeness. God created man in his image; in the divine image he created him; male and female he created them. In the book of Genesis, we learn that all the fundamentals of creation form as they become defined out of the formless abyss of totality. We learn that definitions are only possible from the division into polar opposites. For example, how can you define light without darkness, good without evil, male without female, water without earth, sound without silence, hot without cold, etc.? Therefore, creation is made possible by dividing (powers of 2) a fundamental into two diametrically opposed qualities that allows for the comprehension of both through the existence of its opposite even though they sprang forth from the same source.

If we take white light as a model of creation, we can see that colors result from dividing the white light representing unity into multiple colors by shining it through a prism. This process divides the white light into three main colors symbolic of the trinity of Father, Son, Holy Spirit or Red, Blue and Green. Black is the absence of light or color, in other words, white light is completely absorbed by the darkness and no colors are reflected back. From the three colors red, blue and green, all other color sensations can be made. So in this simple example of white light, we can see how unity was divided into individual unique qualities. Because white light can not exist without it’s opposite (darkness) black, we have the first duality or polar opposite from a common undefined source. Red, Blue and Green light are created when they are divided out from the unity or oneness they experience together as white light. The speed of light is considered as one of the universal constants. It moves about 299,792.5 kilometers per second, or 186,282.4 miles per second. However, if you use nautical miles, which equal 1-minute of latitude at the earth’s equator. The speed of light travels 161,803.4 nautical miles per second, which is equal to the Golden ratio Phi or 1.618034. This ratio occurs in all types of life forms and growth processes.

Mathematically, Phi is the division of something into two unequal parts, in such a way that the lesser is to the greater as the greater is to the whole. An interesting Biblical relationship to Phi is the number of the Beast 666. First, let’s calculate phi. Phi is equal to the square root of 5 (diagonal of a one by two rectangle), which is equal to 2.2360679775. Next we add 1 which increases the number to 3.2360679775. The next step is to divide by 2, which equals 1.61803398875. If we divide Phi by two again (the musical octave) we get 0.8090169943749.
Now here is where it gets interesting. If you take the sine of 666, you get negative \(-0.8090169943749\) and multiplying this by 2 (musical octave) equals \(-1.61803398875\)! For anyone that needs a little refresher course, the sine function gives the ratio of the opposite side of a given angle in a right triangle to the hypotenuse. Also remember that Phi is calculated from the hypotenuse of a 1 by 2 rectangle. From this mathematical exercise, it appears that the Beast is the exact opposite process of Phi, where Phi represents growth, light and life and negative Phi represents decay, darkness and death.

Getting back to the number 12, 144 equals the square of 12, i.e. 12 x 12. We know that there are 24 hours in a day, which is divided into 12 hours of day and 12 hours of night. There are 60-minutes in an hour and 60 times 24 = 1440 (The 12 tribes of Israel is 144,000). Twenty-four equals two times twelve, which is the musical octave of 12 and is represented in the 24 elders, seated around the throne of God. The apparent declination of the sun is zero at the Vernal and Autumnal equinoxes and reaches it’s maximum declination on the summer solstice at +24-degrees. The minimum declination is reached on the winter solstice at negative 24-degrees.

The numbers 1, 2 and 3 are all prime numbers and are symbolic of creation through the holy trinity. The number 12 would be reduced in numerology as 1+2=3, which means that the number 12 is also symbolic of the trinity. According to the rules of music vibration, we know that octaves of the fundamental vibration are created through multiplication or division from the number two. Two times twelve is 24 and half of 12 is 6. It is interesting to note that all prime numbers greater than 3 (the original trinity of prime numbers) are properties of the number six. The formula for creating prime numbers is 6n + 1 where n is any number and + 1 is symbolic of unity or the original cause. For example: 6*2 = 12 and 12 – 1 is 11 and 12 + 1 is 13 and 11 and 13 are prime numbers. 6 *3 is 18 and 18 – 1 is 17 and 18 + 1 is 19 and both 17 and 19 are prime numbers.

In Genesis, God creates Adam, the first man, which most likely represents the first sign of the zodiac, Aries. Aries is a masculine fire sign ruled by Mars ♃, which uses the astrological glyph of a male. Eve is created from Adams rib (symbolic of a division from unity and opposites from a common source, i.e. male-female) and is the second person created by God. The second sign of the zodiac is Taurus, a feminine sign ruled by Venus ♀, which has the glyph of a woman as its symbol. Next we learn that Adam and Eve had relations and that Eve conceived and bore Cain and Abel.

The third sign of the zodiac is Gemini, the twins, which is ruled by Mercury. Gemini is a dual sign and is symbolically portrayed in the story of Abel, a good man and keeper of sheep, who was respected by God and his brother Cain, a tiller of the ground who murders his brother. This story gives us the first three signs of the zodiac: Adam (♈), Eve (♀), Cain & Abel (♌). It is interesting to note that in Genesis, chapter 5, Generations of Adam to Noah, that Cain and Abel do not appear in Adam’s genealogy, even though it appears that these were his first children. I believe that Genesis, verse 26 of chapter 1 contains the creation of the zodiac, where God says “Let us make man in our image, after our likeness”. Verse 27: “God created man in his image; in the divine image he created him; male and female he created them”. In verse 26, we find God talking in plural form “let us”, “in our image” and this likely refers to the creation of the entire zodiac. We later learn in Genesis chapter 5, that Adam has a son “in his own image, after his likeness” at the age of 130 years. Looking at the zodiac in terms of planetary rulers, we find that the next sign ruled by Mars is Scorpio (the ancients also called this sign the Eagle) at 210-degrees of the circle. This sign also has Mars’s nature and is in my opinion the birthplace of Seth. In other words, Adam represents a cycle that starts with Mars in Aries and Seth is a cycle
that starts with Mars in Scorpio and that is why they writer used the term “in his own image, after his likeness”. Since we know that Adam was 130 years old when Seth was born at 210 degrees of the zodiac, we can divide 210 by 130 in order to determine how long the length of a year is. Converting 210 degrees to minutes (multiply by 60) is 12,600 minutes in arc. Note that this value occurs often in the book of Revelations where it is used for days: chapters 11 verse 3 “I will commission my two witnesses to prophesy for those twelve hundred and sixty days, wearing sackcloth”. This shows us that minutes are used and not degrees in calculating biblical days. 1260 minutes divided by 130 is equal to 96’ 55.3846” or 1° 36’ 55” and this is equal to one year in the Bible. Note that in the book of Ezekiel, we learn that the Lord appoints a year for a day. One month is therefore one twelfth or 8’ 4.615” and for a day we divide this value by 30 and find 16.154” seconds of arc. Therefore, to locate the birthplaces of the generations of Adam, we simply multiply the given years by 1° 36’ 55” and we can find the places in the zodiac where they begin and die.

The entirety of the 12 acquires its strength from the Circled Seven. All Praises to The Great God.

Peace,

**Dr. Akhnaton Pert M Hru Tutankhamun Bey**

*Swift Angel #1, Grand National Chairman*
